

2022 AAMC Development Survey Part II - Staff Compensation

Introduction

Welcome to the 2022 AAMC Development Survey Part II - Staff Compensation. The data from the AAMC Development Survey will be used in a national database. Maintained by the AAMC since 1999, this database is for use by medical school deans, teaching hospital and health system CEOs, and their designees at member institutions to assess integral components of a successful development program and to make effective decisions on the deployment of organizational resources.

Part II of the survey collects compensation information of key development staff. Part I of the survey collects information about private support, development staff, and fundraising/development costs.

Any U.S. medical school, teaching hospital, or health system that is a member of the AAMC is encouraged to participate in the annual survey by submitting the requested data about its development programs. Participation in the survey is voluntary. You can decide not to participate or to discontinue your participation at any time without penalty. However, only those institutions that participate in the survey will have access to the full results when they are available in August 2023. The expected time to complete this survey is about two hours. Once your data are compiled, the survey should take approximately half an hour to complete. **The deadline for completing the survey is March 15, 2023.**

Data Confidentiality Policy

The salary data collected for individual positions at an identified institution are classified by the AAMC as confidential. Confidential data are data that may not be released outside of the AAMC with individual or institutional identification, except with permission. Individuals may grant AAMC permission to release confidential data that describe themselves. An authorized representative of an AAMC member institution may grant AAMC permission to release confidential data that describe his or her institution. To ensure confidentiality, compensation information will be reported only in the aggregate and when there are at least five individuals represented.

All other survey data are classified as restricted. Restricted data are data that may not be published with identification but may be disclosed to external parties with management approval. These data will be released with institutional identification to survey participants but will not be made available to the public.

Contact information you provide when filling out this survey will be used to contact you if we have a question about your response(s). Contact information will also be included in the data file provided to participating institutions.

Data will be stored for multiple years in order to provide you and your institution with the most comprehensive analysis. Your responses will be securely stored by the AAMC with appropriate access controls to limit exposure of your data to those with a need to know.

Risks/Benefits

This data collection is considered to be minimal risk. While the AAMC has taken extensive measures to ensure the security of the data and the confidentiality of the responses, if the compensation data provided in response to Part II of the survey were made public in an individually identifiable way, it could prove embarrassing to individuals or institutions. If the restricted data provided in response to Part I of the survey were made public, it is expected to have a limited adverse effect on individuals and institutions. Institutionally identified data will only be shared with participating institutions. Institutions that are given access to restricted information may not publish or share it with others.

Only participating institutions will receive access to all institution-level responses to Part I of the survey, as well as

aggregated compensation data from Part II of the survey. An institution that participates in the survey can access survey analyses that enable representatives to:

- View a comparison chart of your institution and up to three others at a time, showing select total private support, development staff, and fundraising/development costs data.
- View a summary of the compensation data.
- View institution-level data from the survey.

Instructions for accessing data will be provided to participating institutions when the analyses become available in August 2023.

Contact Information

This data collection has been reviewed according to AAMC policies and procedures. Questions, comments, or suggestions on the content of the survey should be directed to survey staff at developmentsurvey@aamc.org.

By clicking the "Save and Continue" button, you acknowledge that you have read the above statement and understand the risks and benefits of participation and would like to continue.

Survey Instructions and Definitions

You may wish to print this page for your reference. A blank PDF of the survey is available for reference on the [AAMC website](#) under the "Explore this report" section. You will have the opportunity to print your responses immediately after submitting the survey. Please note the instructions on the last page of the survey.

General

- If a question is not applicable to your institution, please leave the field blank. Only insert a zero ("0") if it represents an actual value or numeric response.
- If there is more than one employee in a position, please provide the median compensation.
- After completing the survey, please click the "Submit Survey" button on the final page of the survey to submit the survey. After clicking this button, you will see a complete listing of the responses you entered. You can print the list of responses for your records by using the print command. If you need to update your responses, you may return to this survey to make updates at any time before the survey deadline.

Institution Type Classification

Survey participant institutions are classified according to institutional type. The categories of institutional type relate to an institution's development program defined for the purpose of survey analyses. The following are categories of institutional type:

- Medical School - Development program is separate from the development program(s) of your institution's primary teaching hospital(s).
- Teaching Hospital - Development program is separate from medical school. This could include, for example, children's hospitals, rehabilitation hospitals, psychiatric hospitals, cancer specialty centers/hospitals, "stand-alone" hospitals that have separate foundations or programs, etc.
- Joint Program - Development program is integrated and conducted jointly for benefit of both the medical school and the teaching hospital(s).

Compensation of Key Development Staff

Only staff in the medical school, teaching hospital, or joint program budget should be included in this section of the survey.

- Salary - reported as the base compensation of the staff member. If there is more than one employee, please provide the median salary.
- Other Compensation - can include incentive bonuses, car or car allowances, personal private club memberships, and educational tuition discounts/waivers. (Do not include retirement and medical/hospital and life insurance benefits in this section.)
