## National Data on Medical Student Success Outcomes

## Updated April 2024

This document features national data on medical student outcomes from the most recent cohorts available. The grids below describe how well undergraduate GPAs and MCAT scores predict medical student performance on the Step 1 exam (first attempt and ever), the Step 2 CK exam (first attempt and ever), on-time progression to year three, progression to year three with an extra year, and graduation from medical school within four or five years. The first set of grids use total GPA and total MCAT score. The second set of grids use BCPM (biology, chemistry, physics, math) GPA and total MCAT score. All MCAT scores are from the current version of the MCAT exam. Examining the associations of undergraduate GPAs and MCAT scores with these varied outcomes provides different insights about the likelihood of success for applicants with different ranges of undergraduate GPAs and MCAT scores. This information is also available online at aamc.org/mcat-data.

Passing Step 1 on the First Attempt by Total GPA/Total MCAT Score: 2019, 2020,and 2021 Matriculants

| GPA | MCAT Total |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

[^0]:    Note: Green $(\bullet)=$ pass rates of $90 \%-100 \%$; yellow $(\boldsymbol{\bullet})=$ pass rates of $80 \%-89 \%$; blue $(\boldsymbol{\Delta})=$ pass rates of $70 \%-79 \%$; white $(\bullet)=$ pass rates of $69 \%$ and lower. Cells with dashes $=$ fewer than 10 observations; blank cells = zero observations. For students who took the MCAT exam multiple times, the most recent MCAT total score was used in this analysis.
